Good morning, All – We asked Earthjustice to send us their questions in advance in an effort to make our call as productive as possible. Please see below. Thanks! -- Tressa

Hello Tressa,

Thank you, once again, for setting-up this call. Here are some of our questions:

1. What happened to containment area 1 (part of the wastewater system)? What, if anything, replaced it?
2. Any theories of what is causing the health problems in the community?
3. Are there any plans to address the defects found in the multimedia compliance inspection report?
4. How much notice did Georgia Pacific receive before the multimedia compliance inspection?
5. The wastewater system for Georgia Pacific has specific permit limits on the amount of air pollutants that can be emitted. Is there any way to determine compliance with these permit limits?
6. Has anyone tested or considered testing the soil?
7. Has anyone tested or considered testing for VOCs?
8. NPDES permit – why is Georgia Pacific allowed to include a creek and lake, after Georgia-Pacific's discharge point, as part of their wastewater treatment?
9. Is any additional testing being planned as part of the NPDES or Title V renewals?
10. What is the timeline on the NPDES and Title V permits?
11. What resources are available for testing in light of this being “making a visible

difference" community?

12. The citizens reference receiving a questionnaire from ADEQ, is anyone aware of what this is?

Thanks again, and I look forward to talking with you again on Thursday.

Best,

Bradley
